(Sojin) Kim, Tyler Yang, Trey  
Burgess

# Introduction

Collective intelligence is a growing power in the medical field. While this power is easy to harness in urban areas, it is difficult to establish in rural areas.

CollectiveGood aims to develop a collective database of medical information that can be shared as diagnostic support throughout the world.

# Our Web Application features

**01.**

Upload raw data of medical case studies and create case study cards

**02.**

Validate case study cards filled out by other users

**03.**

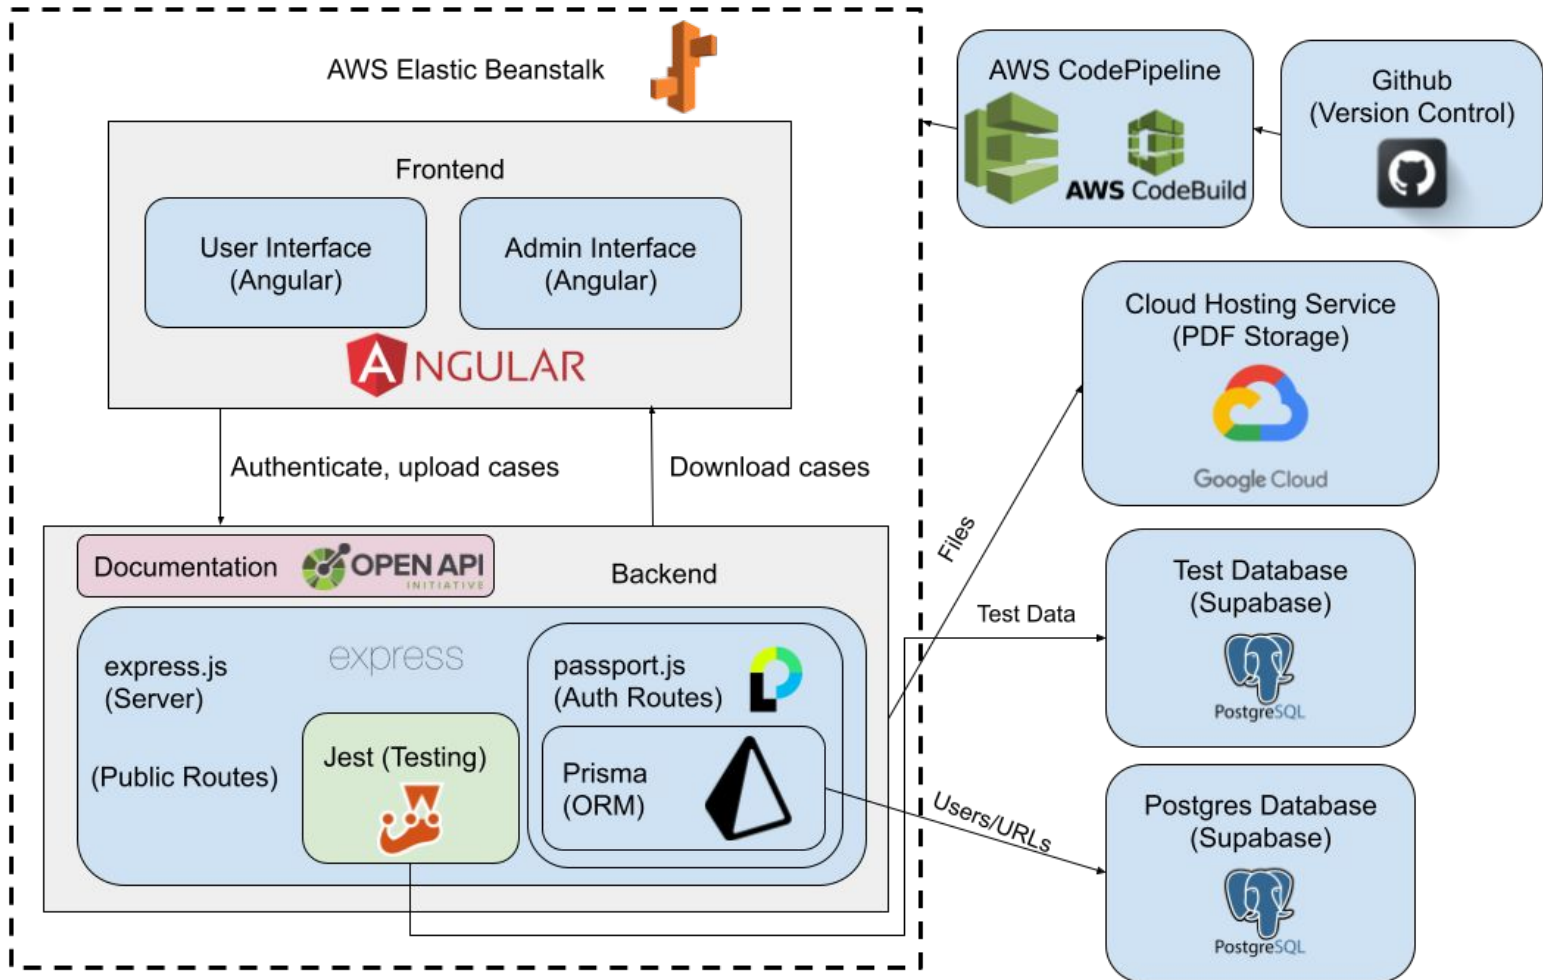

View completed case study information for diagnostic support

02.

# Architecture Diagram

# Platform Tools

PostgreSQL

Express

Prisma

Google Cloud

TypeScript

Time for a  
Demo

# Changes and Lessons Learned

## Cloud Services

Google > AWS

## Project Management

Scheduling conflicts, To-do lists, communication preferences, frontend/backend lead roles

## Client Pushback

(or lack thereof)

Client was extremely flexible and understanding

## Documentation

Necessary specifications and documentation are not to be underestimated
