A RESEARCH STUDY CONDUCTED BY THE
PROGRAM ON AGING, CHRONIC ILLNESS,
AND LONG-TERM CARE

What is Project ECHO®?

The Alzheimer's and Dementia Care ECHO® Program - offered by the Alzheimer's Association® - is a six-week, one-hour per week program. It promotes building skill to provide the best dementia care.

ECHO connects people with dementia care experts in a free series of interactive, case-based video conferencing sessions.

Benefits of Project ECHO®

- Creates community among multiple levels of staff and across organizations
- Case-based peer learning, talking about situations experienced in actual care
- Educational presentations from experts
- Video conferencing for accessibility
- Access to resources used during the series
- Increased knowledge and confidence in dementia care
- No cost to communities
