

1 in 10

verunaH2O.org

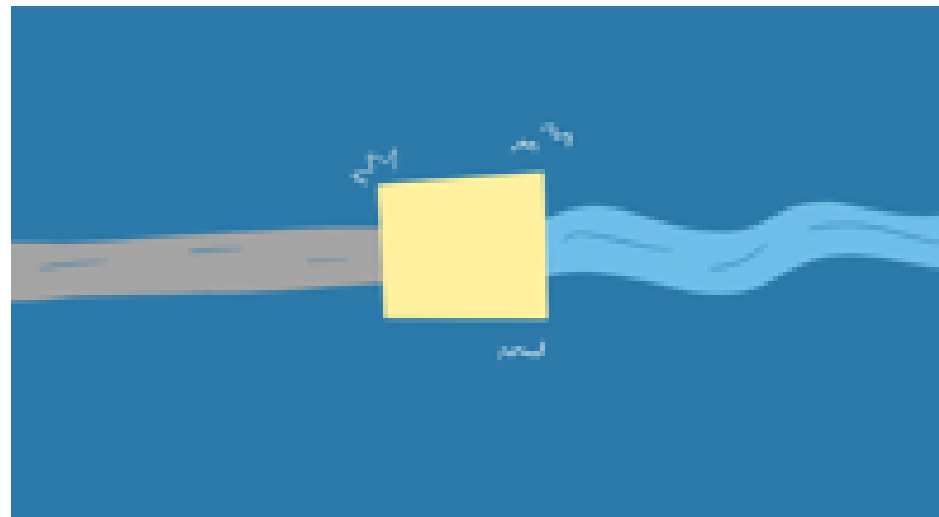

7% of our planet is covered in water. But most of it you can't drink.

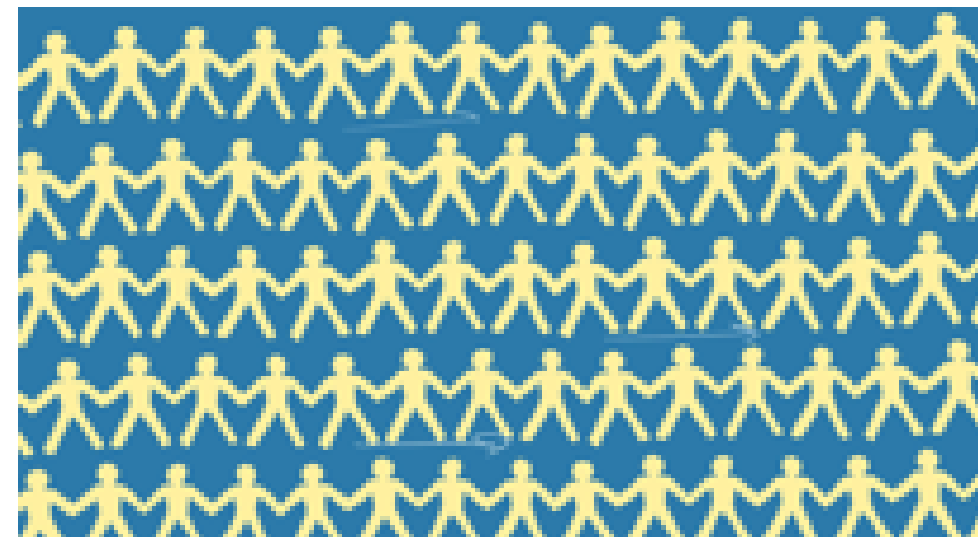

In fact, 1 in 10 don't have clean drinking water.

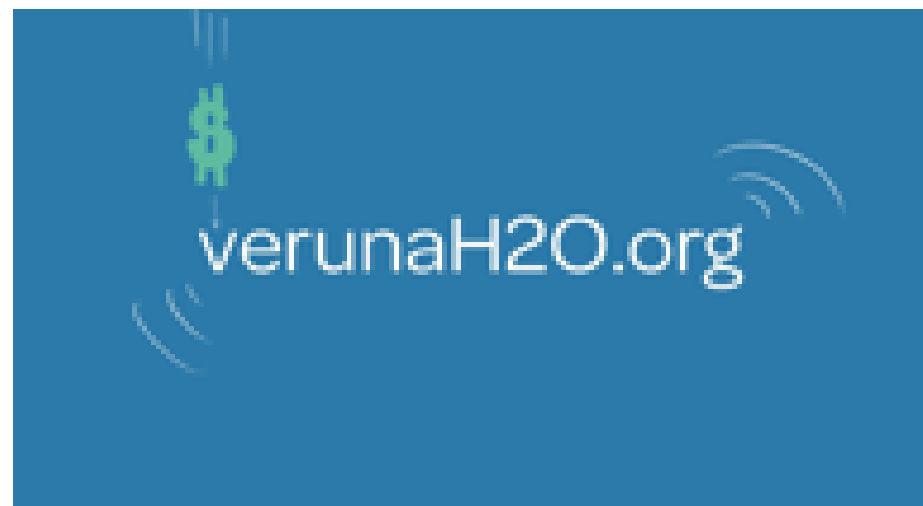

So how do we turn this, to this?

By building technology that lets us remove salt and contaminants from the water for a fraction of the cost.

But we can't do it alone, we need your help.

Every dollar makes a difference so head to venturaH2O.org and pledge as little as \$1 a month. Help us turn this into this (replay that one slide)
